The diagrams are offered for personal use only; for any other use please contact me for permission at [models@kalei.com](mailto:models@kalei.com)

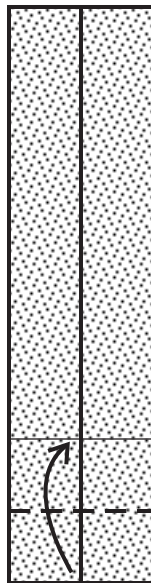

1. Book fold to center.

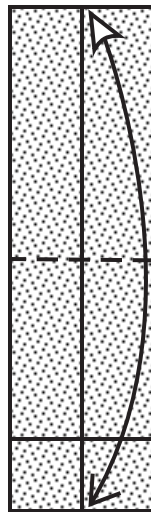

2. Book fold to center again.

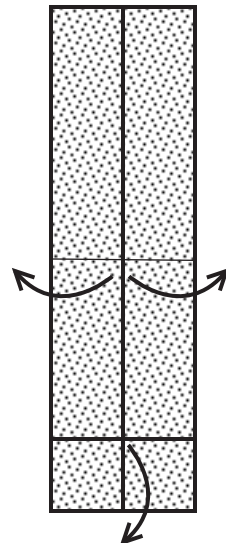

3. Pinch to mark center, then valley fold to center, crease and unfold.

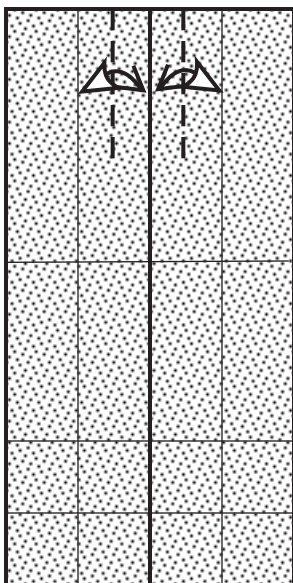

4. Valley fold to crease just made in step 3.

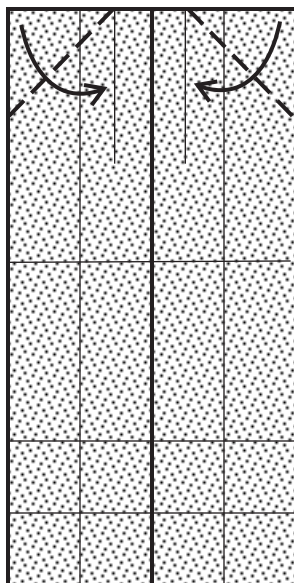

5. Valley fold and unfold to the folded up edge.

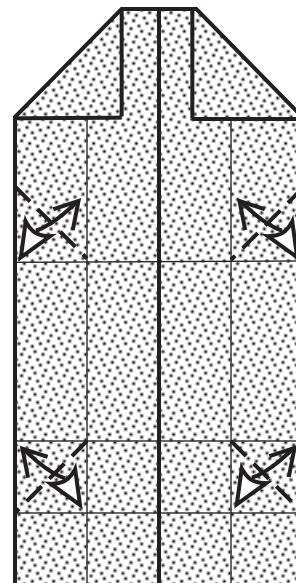

6 Unfold to step 2.

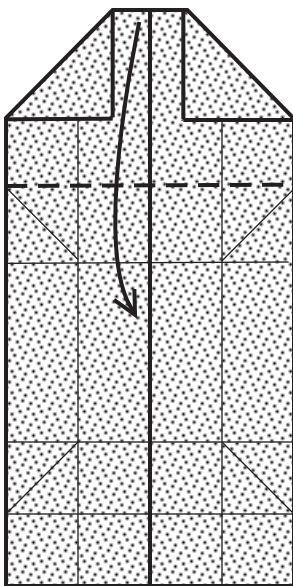

7. Fold and unfold top layer for landmark.

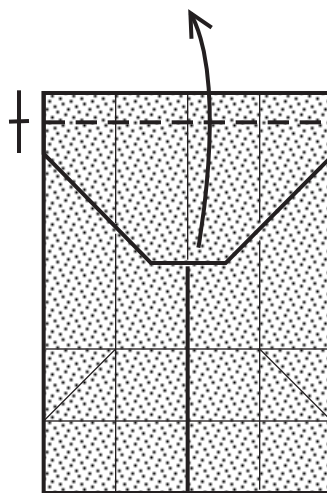

8. Valley fold to crease.

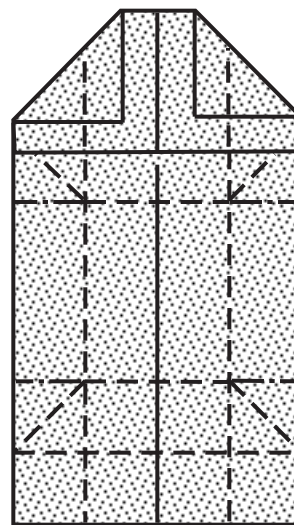

9. Valley fold and unfold the diagonals.

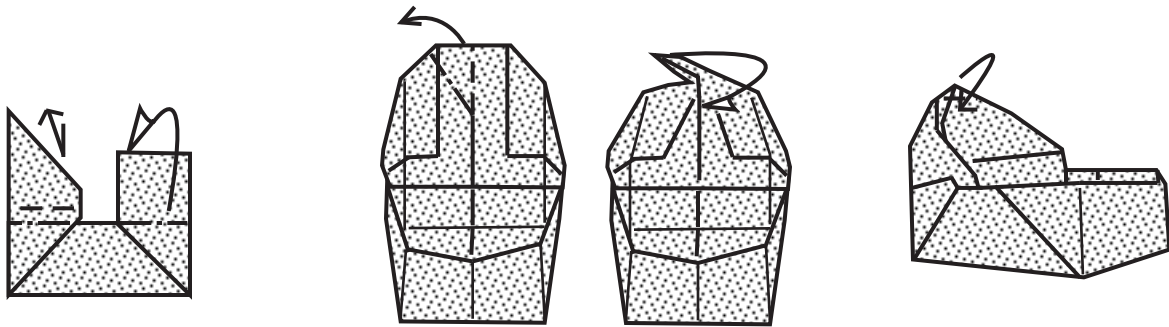

10. Valley fold. Note: this fold will align on the top edge of the diagonal crease.

11. Valley fold. Note: This fold will be half the distance of the flat edge on the side of the flap.

12. Unfold the accordion pleat and form the box.

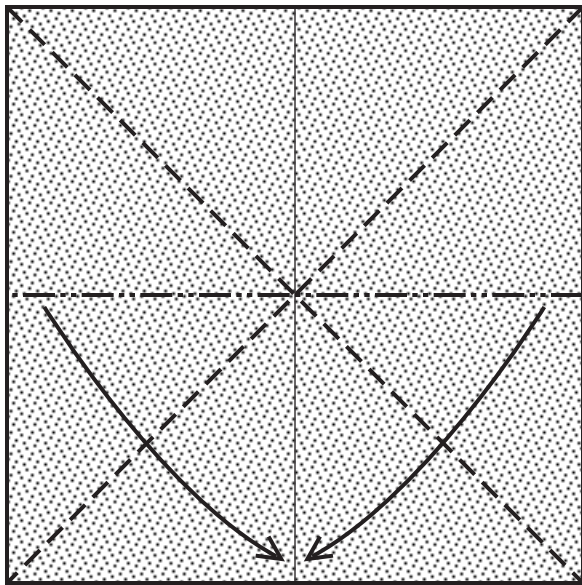

13. (Side view)

Mountain fold flap to the inside and reform the accoridan pleat to lock the box shape.

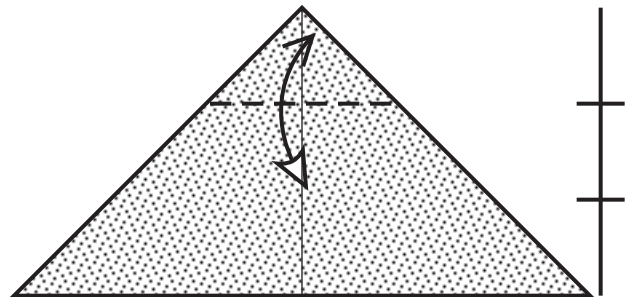

14. Make a dart by pinching along the center line until the bonnet curves forward. crease to the left. Then inside reverse the extra paper to the inside of the model.

15. Make a small valley fold on the tip to lock the dart and create a smooth line to the bonnet edge.

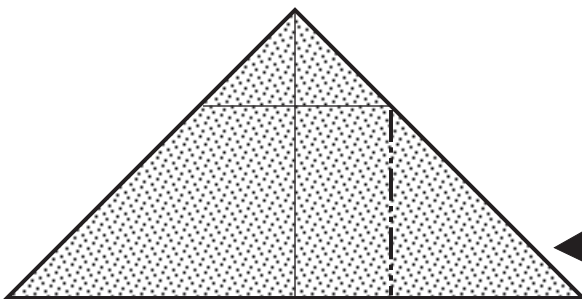

Stand: (Made from the same size paper.)

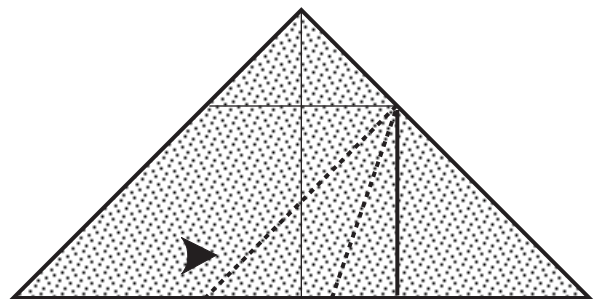

1. Do the star precrease thing and collapse into a waterbomb.

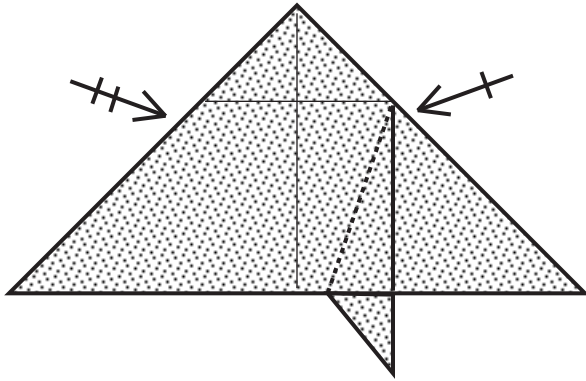

2. Valley fold the top third down, crease and unfold.

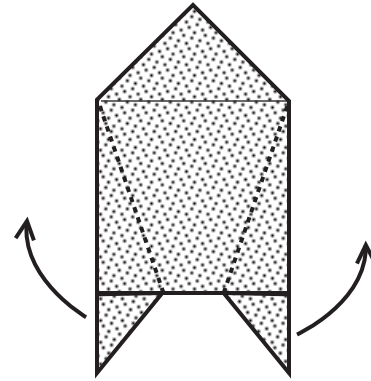

3. Inside reverse fold the top flap.

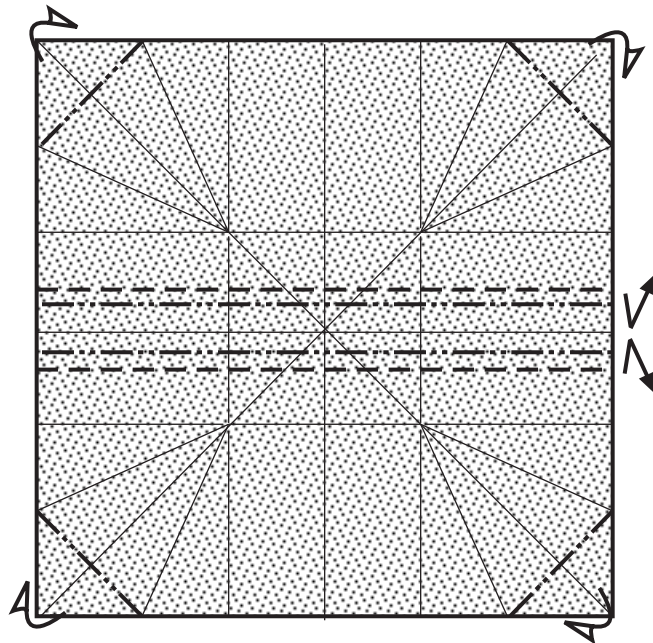

4. Inside reverse fold the same flap again.

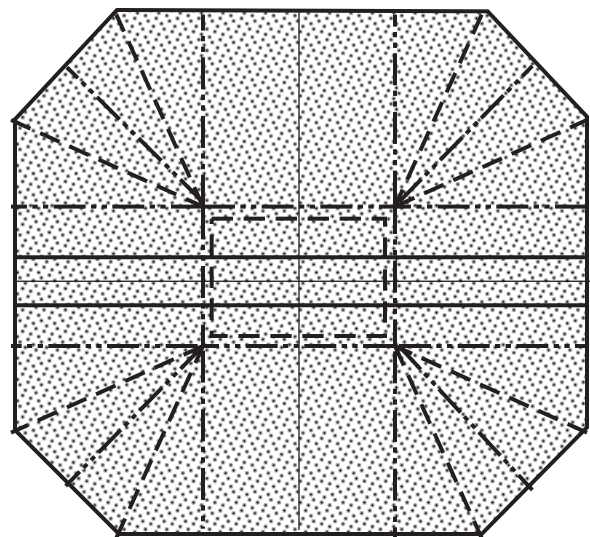

5. Repeat steps 3 & 4 on the other three flaps.

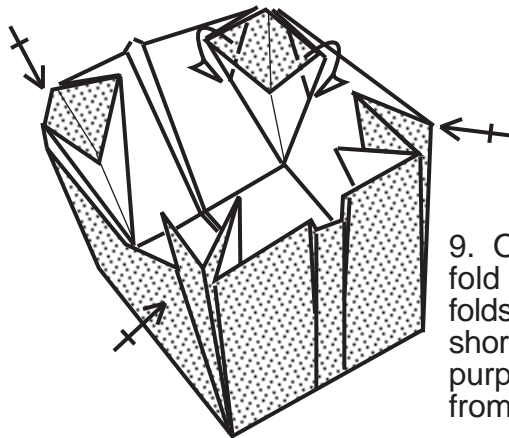

6. Unfold model.

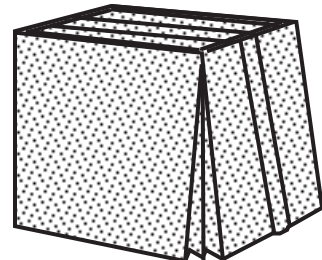

7. Mountain fold the corners behind noting the landmarks. Box pleat the center section so that it is just a tad wider than the width of the basket.

8. Reform the corner crimp folds along existing creases. Flatten the center of the model and pinch a slight depression to cradle the basket.

9. On the inside mountain fold the corners of the crimp folds. These folds should end short of the corner. Their only purpose is to keep the stand from spreading open too far.

10. Fini!! Just nestle the basket on the stand.
